

MOSQUITO CONTROL PROGRAM

April to October
(Weather Permitting)
Monday through Friday

- * Neighborhood truck spraying -as needed during dusk & dawn Hours with FDA approved products
- * Larviciding - environmentally friendly elimination of young Mosquitoes
- * Barrier spraying for parks & other City owned property only
- * Testing and surveillance - In compliance with State & Federal Regulations

What you can do today to prevent the overpopulation of mosquitoes in your area! Female mosquitoes need standing water to lay eggs, try these tips to eliminate

Mosquitoes by your home.

1. Turn over any unused flower pots to eliminate standing water.
2. Clear the rain gutters on your house of any leaves to prevent water from collecting.
3. Discard tires and any other yard debris that hold rainwater.
4. Refresh your birdbath's water every week.
5. Store children's toys under cover where they will not collect water.
Change water in children's wading pools frequently.

If you should have any mosquito problems or questions on how you can help curb our city's mosquito population please contact us at 256-549-4706 or e-mail tjackson@cityofgadsden.com
